# Equipment measurement sheet

Prepare your inventory for custom foam. Fill it in using millimeters.

## Before you measure

1. Choose the storage position: lying down, upright, or disassembled.
2. Measure the full setup with accessories that stay attached: cage, grip, caps.
3. Record the maximum outer dimensions; do not add a foam allowance yourself.

## Kit inventory

| Model / item | Qty. | L (mm) | W (mm) | H (mm) | Attached accessories / position |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

## Your case, if you already have one

Make and model:

Usable interior dimensions L × W × H (mm):

## Things to check

Lid, overlooked accessories, items to remove, and preferred date.

## Prepare my quote

Copy this inventory and your measurements into the form. Say whether you already have a case or need one supplied.
